**I-Phone application for Non GMO shopping (I-Tunes store → " ShopNoGMO ")**

**GMO Free Washington - [www.GMOFreeSeattle.com](http://www.GMOFreeSeattle.com)**

**GMO Free Washington** is a Seattle (Western WA.) based action group that works together to help educate & work toward a Non-GMO future here in Seattle & around the entire planet.

We're concerned with the genetic modification of our (your) foods and seeds.

Our [www.GMOFreeSeattle.com](http://www.GMOFreeSeattle.com) → GMO Document Library – is filled with information, > 100 articles (scientific & non scientific), brochures (i.e. shopping, dining out, etc.), to use & share with others

Our 1<sup>st</sup> goal is to collaborate with others locally as well as nationally to collaborate and grow our group in order to be more effective with exciting local projects. We'll follow events such as the "Right to Know March" in D.C, Oct 16 and there will be local activities planned around this.

Our 2<sup>nd</sup> goal, will be to create a unified stand against these Genetic Engineering (GE) companies and to make Seattle a GMO-Free zone, and for those wanting to participate, which may involve organizing visible protests against companies like Monsanto. The other part is to be able to "vote with our dollar" to show that we are serious. Not everyone is able to cut out GMO products because they are cheaper. Through education about the effects of a GMO laden diet we will help people make better & healthier food choices. We'll work with food stores, & restaurants to help educate them to become more GMO free which will help them have a marketing edge because of their non-GMO status.
